

PROFESSIONAL SUMMARY

Full Stack Developer and Software Engineer with hands-on experience designing, developing, deploying, and hosting responsive websites, e-commerce platforms, admin dashboards, internal business systems, and AI-enabled applications. Skilled in Next.js, React, TypeScript, JavaScript, Tailwind CSS, Python, Django, REST APIs, PostgreSQL/MySQL, WordPress, Shopify, SEO, Git, Docker, and Vercel. Experienced in end-to-end delivery, including domain and DNS setup, SSL, web hosting, deployment, performance optimization, maintenance, and client support.

TECHNICAL SKILLS

Programming Languages: Python, C, C++, JavaScript, TypeScript

Frontend: Next.js, React, HTML, CSS, Tailwind CSS, Responsive UI Design

Backend & Systems: Node.js, Django, REST APIs, Authentication, Backend Development, Admin Dashboards

Databases: PostgreSQL, MySQL, Supabase

CMS & E-commerce: WordPress, Shopify, Content Management, Product Catalog Management

SEO & Web Operations: On-page SEO, Content Optimization, Metadata, Technical SEO Fundamentals

Deployment & Hosting: Vercel, Web Hosting, Domain/DNS Setup, SSL, Website Migration, Maintenance

AI & Data: Pandas, NumPy, Data Preprocessing, Machine Learning Foundations, AI Agents

DevOps & Tools: Docker, Git, GitHub, Linux CLI, API Integration, Automation

Soft Skills: Problem Solving, Analytical Thinking, Communication, Collaboration, Adaptability

PROFESSIONAL EXPERIENCE

Freelance Web Developer & SEO Specialist | Remote 2024 - Present

- Delivered client websites and e-commerce improvements from planning through deployment, hosting, maintenance, and ongoing updates.
- Supported on-page SEO for Kown Art, a WordPress art and home-decor marketplace, including product/category content, metadata, structure, and discoverability.
- Supported SEO and store optimization for Emit Performance Store, a Shopify automotive performance-parts e-commerce website.

Client websites: kownart.com | emitperformance.com

Tech Stack: WordPress, Shopify, SEO, HTML, CSS, Content Optimization, Website Maintenance

Full Stack Developer | Al Mamzar Real Estate & Mamzar IT Consultation - UAE 2024 - 2025

- Designed and developed the Al Mamzar Real Estate public website and admin dashboard end-to-end, including property listings, search and filters, property pages, users, inquiries, communities, off-plan content, and content-management workflows.
- Built and integrated REST APIs with internal and external systems to synchronize property and business data, automate workflows, and connect the website, dashboard, backend services, and databases.
- Also developed the MITC corporate website and other client websites, and managed hosting, deployment, domains, DNS, SSL, backups, updates, troubleshooting, and ongoing maintenance.

Platforms: Al Mamzar Real Estate website & admin dashboard | **Website:** mitc.ae

Tech Stack: Next.js, React, TypeScript, JavaScript, Tailwind CSS, Node.js, REST APIs, API Integration, Databases, Git, GitHub, Web Hosting, DNS, SSL, Docker

Software Engineer | 24 Degree Interiors - UAE 2024

- Designed and developed a premium responsive website showcasing interior-design services, studio identity, selected residences, materials, process, journal, and inquiries.
- Created a polished editorial interface with structured galleries, smooth interactions, reusable components, and mobile-responsive layouts.
- Handled deployment and hosting on Vercel, Git-based updates, production configuration, and ongoing website maintenance.

Website: 24-degree-interior-design.vercel.app

Tech Stack: Next.js, React, TypeScript, Tailwind CSS, Git, GitHub

PROFESSIONAL EXPERIENCE - CONTINUED

Full Stack Developer | Khaless Engineering Consultancy - UAE 2020 - 2022

- Developed an internal CRM and HR management system supporting employee records, operational workflows, and structured business data.
- Built backend logic and REST APIs for employee management, workflow organization, and centralized data handling.
- Automated administrative processes to reduce manual workload and improve operational consistency and tracking.

Tech Stack: Python, Django, REST APIs, PostgreSQL, Git

Worod Hazem

Full Stack Developer | Software Engineer | AI & Data Systems

Abu Dhabi, United Arab Emirates | [0501757360](tel:0501757360) | wforcoding@gmail.com

SAKAN AI - Housing Arrears Decision Platform | Agentera x MOEI Hackathon

Tech Stack: Next.js, TypeScript, AI Agents, Supabase, REST APIs

- Built an AI-enabled public-sector decision platform with readiness scoring, document validation, key decision factors, and officer review workflows.
- Implemented structured eligibility logic, salary-mismatch handling, active-request detection, smart routing, and explainable recommendations.

Live: sakan-ai.com

Diagora | Multi-Agent AI Decision Support System

Tech Stack: Python, Next.js, APIs, AI Agents

- Developed a multi-agent decision-support system that simulates collaborative reasoning between specialized AI agents.
- Built orchestration logic for structured analysis, risk highlighting, and explainable AI outputs.

Predictive Maintenance System | Industrial AI Project

Tech Stack: Python, Pandas, NumPy, Docker

- Developed data-preprocessing and prediction workflows for equipment-failure risk estimation using operational data.
- Prepared containerized deployment environments for scalable API integration and real-time prediction workflows.

MedGuard | Healthcare Decision Support Tool

Tech Stack: Next.js, APIs, Data Processing

- Developed a healthcare decision-support application recommending hospitals based on urgency level and operational factors.
- Structured user inputs and generated clear recommendation outputs to improve guidance and decision-making.

ACHIEVEMENTS & ACTIVITIES

1st Place Winner - Building AI Application Challenge (April 2026)

Awarded first place by Decoding Data Science for developing an AI-powered application focused on a real-world challenge.

Volunteer AI Agent Trainer - AgenticVersa AI Program

Supported participants during hands-on AI-agent learning activities, explained workflows, and helped troubleshoot implementation challenges.

Participant - Agentera x MOEI AI Hackathon

Contributed to SAKAN AI, a housing-arrears decision platform designed around structured eligibility and explainable recommendations.

Participant - Agents Assemble: The Healthcare AI Endgame

Contributed to a multi-agent AI concept focused on improving medical decision-support workflows.

Healthcare Innovation Challenges with Cleveland Clinic

Contributed ideas for AI-driven triage and patient-workflow solutions.

Cybersecurity Workshop

Attended a workshop organized by Khalifa University and the UAE Cybersecurity Council.

EDUCATION

42 Abu Dhabi - Software Engineering and AI Program 2024 - Present

Bachelor of Science in Software Engineering 2015 - 2019
